

UID EX 9

NAME: DHARSHINI G

ROLL NO: 240701121

AIM:

The aim is to design a student registration form that validates input fields such as name, age, password, and confirm password, and displays appropriate error messages using HTML, CSS, and JavaScript.

PROCEDURE:

Step 1:

Setting Up the HTML Form

Start by creating an HTML form with input fields for name, age, password, and confirm password.

```
<> index.html > html
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4  <meta charset="UTF-8">
5  <meta name="viewport" content="width=device-width, initial-scale=1.0">
6  <title>Student Registration</title>
7  <link rel="stylesheet" href="style.css">
8  </head>
9  <body>
10
11  <div class="container">
12  <form id="regForm">
13
14  <label>Name:</label>
15  <input type="text" id="name" required>
16  <span id="nameError" class="error"></span>
17
18  <label>Age:</label>
19  <input type="number" id="age" required>
20  <span id="ageError" class="error"></span>
21
22  <label>Password:</label>
23  <input type="password" id="password" required>
24  <span id="passError" class="error"></span>
25
26  <label>Confirm Password:</label>
27  <input type="password" id="confirmPassword" required>
28  <span id="confirmError" class="error"></span>
29
30  <button type="submit">Register</button>
31
32  </form>
33  </div>
34
35  <script src="script.js"></script>
36  </body>
37  </html>
```

Step 2:

Styling the Form with CSS

Next, add some basic styling to make the form look neat and user-friendly.

```
# style.css > .error
1  body {
2      font-family: Arial;
3      background: #f4f4f4;
4      display: flex;
5      justify-content: center;
6      align-items: center;
7      height: 100vh;
8  }
9
10 .container {
11     background: white;
12     padding: 20px;
13     border-radius: 5px;
14 }
15
16 input {
17     display: block;
18     margin-bottom: 10px;
19     padding: 8px;
20     width: 100%;
21 }
22
23 button {
24     padding: 10px;
25     background: blue;
26     color: white;
27     border: none;
28 }
29
30 .error {
31     color: red;
32     font-size: 12px;
33 }
```

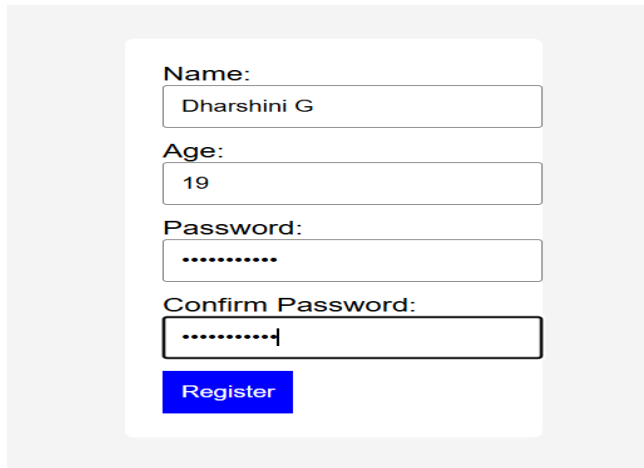

Adding JavaScript for Validation

Finally, add JavaScript to validate the input fields and display error messages.

```
JS script.js > ...
1  document.getElementById("regForm").addEventListener("submit", function(e) {
2      e.preventDefault();
3
4      let name = document.getElementById("name").value;
5      let age = document.getElementById("age").value;
6      let pass = document.getElementById("password").value;
7      let confirm = document.getElementById("confirmPassword").value;
8
9      let nameError = document.getElementById("nameError");
10     let ageError = document.getElementById("ageError");
11     let passError = document.getElementById("passError");
12     let confirmError = document.getElementById("confirmError");
13
14     // Clear errors
15     nameError.textContent = "";
16     ageError.textContent = "";
17     passError.textContent = "";
18     confirmError.textContent = "";
19
20     // Validation
21     if (name.length < 3) {
22         nameError.textContent = "Name must be at least 3 characters";
23     }
24
25     if (age < 18) {
26         ageError.textContent = "Age must be 18 or above";
27     }
28
29     if (pass.length < 6) {
30         passError.textContent = "Password must be at least 6 characters";
31     }
32
33     if (pass !== confirm) {
34         confirmError.textContent = "Passwords do not match";
35     }
36
37     if (name.length >= 3 && age >= 18 && pass.length >= 6 && pass === confirm) {
38         alert("Registration Successful!");
39     }
40 });
```

OUTPUT

For valid input:

A registration form with a light gray background. It contains four input fields: 'Name:' with 'Dharshini G', 'Age:' with '19', 'Password:' with '.....', and 'Confirm Password:' with '.....'. Below the fields is a blue 'Register' button.

Name:
Dharshini G

Age:
19

Password:
.....

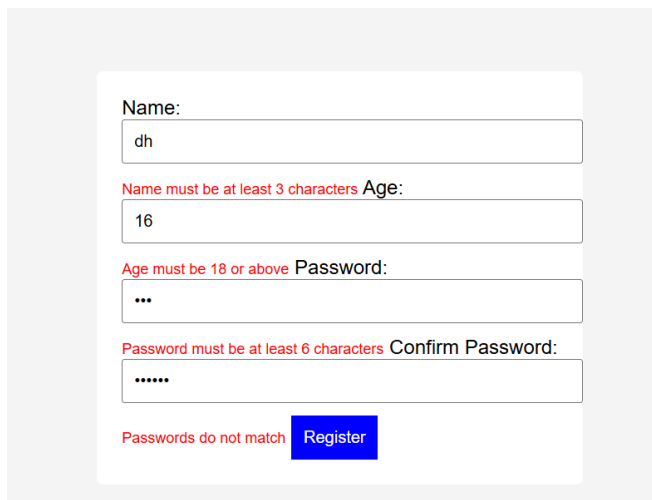

Confirm Password:
.....

Register

Error message for invalid name:

Error message for invalid age:

Error message for password mismatch:

A registration form with a light gray background, showing error messages in red text. The 'Name' field contains 'dh' with the error 'Name must be at least 3 characters'. The 'Age' field contains '16' with the error 'Age must be 18 or above'. The 'Password' field contains '...' with the error 'Password must be at least 6 characters'. The 'Confirm Password' field contains '.....' with the error 'Passwords do not match'. A blue 'Register' button is at the bottom right.

Name:
dh
Name must be at least 3 characters

Age:
16
Age must be 18 or above

Password:
...
Password must be at least 6 characters

Confirm Password:
.....
Passwords do not match
